

Highway Draw Tape Litter Bag

Warmer weather means it's time for states and municipalities to begin roadside clean up. Pitt Plastics is excited to offer an exceptional alternative for roadside trash disposal. Our **DTL3742G** Highway bag is extremely durable at 1.5 mil, and is produced with co-extruded 100% premium virgin resins for additional strength. These bags are side-welded to prevent leakage with no seal at the bottom of the bag and are interleaved for one-at-a-time dispensing. Our draw-tape functionality enables us to make the bag shorter, thus saving resin and cost. Its bright

orange color provides outstanding visibility for roadside pickup. Please contact your local Pitt Plastics representative and/or distributor for information and availability.
