

INTEPLAST GROUP[®]
Pitt Plastics

YOUR COMPLETE SOURCE FOR MORE THAN JUST CAN LINERS

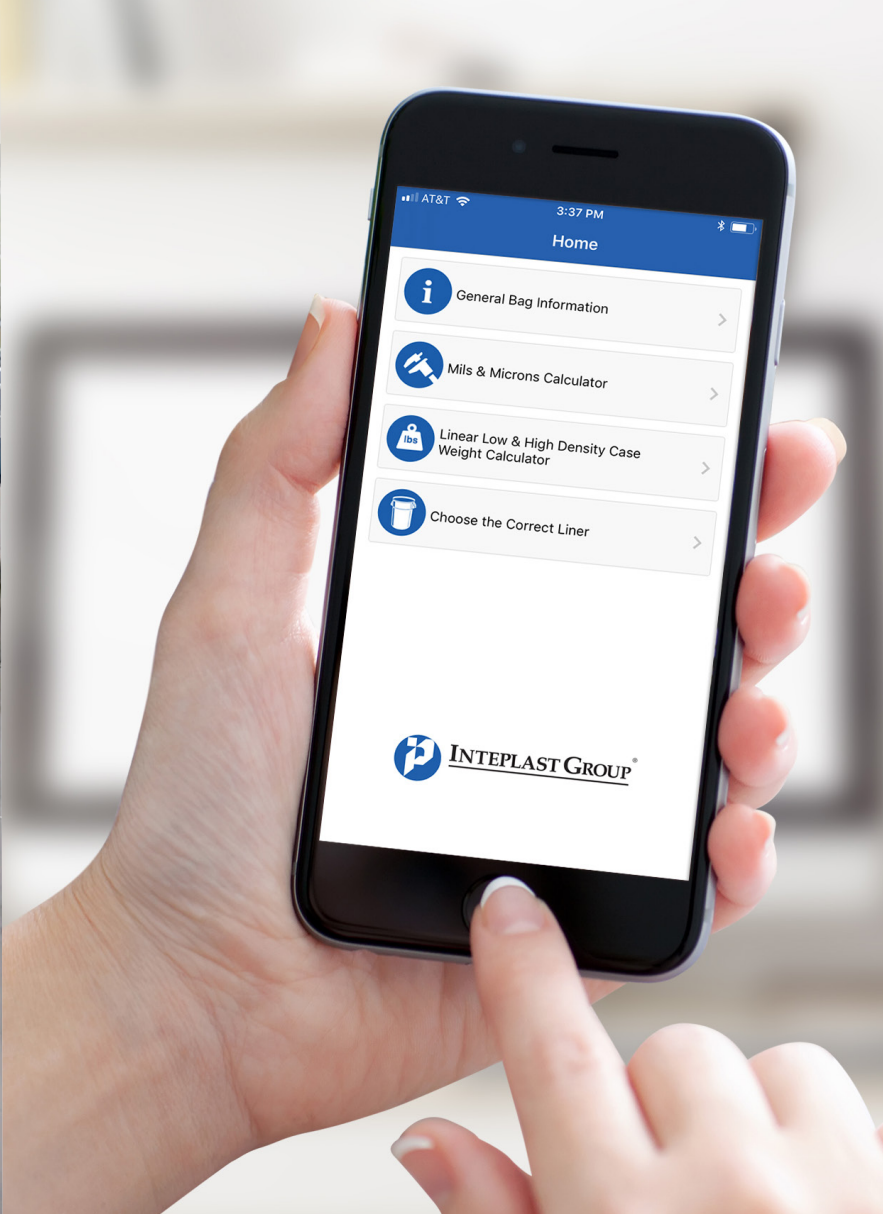

CAN LINERS • DISPOSABLE GLOVES • FOODSERVICE BAGS
CARRY OUT BAGS • AND MUCH MORE!

FALL 2023

ABOUT PITT PLASTICS

- Making exceptional quality bags since 1972
- A member of the Inteplast Group family of companies since 2012
- Joining the Inteplast Group has greatly enhanced our portfolio of products, brand names, services, and global resource maximization capabilities
- We focus on Quality, Service, and Consistency
 - We pride ourselves in delivering and assuring consistent quality.
 - In regards to service, we have one team, one culture, and one mission – delivering excellence!
 - To be truly remarkable, a company must be consistent in its efforts to meet and exceed customer expectations. We are!

CANALYZER APP

Can Liner Calculator for iPhone, iPad & Android

- Be assured you're getting what you've paid for
- Quick and easy access to useful can liner calculations
- Takes the guesswork out of determining the correct bag for your receptacle
- Conversions from Mils to Microns and back in seconds
- Enter just four numbers and your net case weights are calculated for you
- Once your ideal liner is determined, the app will display the product codes and information for that size

IN-HOUSE SAMPLE DEPARTMENT & SAMPLE KITS

- Variety of sample packets to serve variety of customers
 - Sample kits geared towards different markets:
 - Food Service
 - Jan San
 - Healthcare
 - Green Solutions
- In-House Sample Department
Phone: **1-800-835-0366**
Email: **samples@pittplastics.com**

SEGMENT MARKETING

FOCUSED

- Messages are tailored for each segment: Specific product offerings with relevant information and images
- Create multiple pieces – each of your segments get the attention it deserves

EFFICIENT

- Each piece gets to the heart of what that particular segment wants and/or needs
- Literature space is utilized – more likely that things listed are relevant to end user
- Inform and persuade in just one piece!

CAN LINERS 101: Everything You Need to Know About Can Liners!

DEFINITIONS

- **Film Strength:** Refers to the physical strength of the can liner.
- **Dart Drop Test:** Used to determine the resistance of a bag to local failure or puncturing of the film.
- **Elmendorf Tear Test:** Used to measure the resistance to tearing or puncturing.
- **Gauge:** A term used to describe the thickness of a liner. Linear Low Density liners are measured in mils, while High Density liners are generally measured in microns.
- **High Density Polyethylene:** Dense, economical, hydrocarbon-plastic having good moisture barrier and chemical resistance. Performs well under extreme temperature. Offers superior vapor and moisture protection. Not recommended for sharp or jagged objects.
- **Linear Low Density Polyethylene:** Superior stretch properties provide maximum puncture and tear resistance. Stronger than traditional low density material and non-porous. Better clarity than high density material.
- **Micron:** Based on one millionth of a meter, or one thousandth of a millimeter (.000000). Typically used to designate the thickness of High Density liners. High Density liners usually range from 6 to 24 micron in thickness.
- **Mil:** Measurement based on thousandths of an inch (.000). For example, a .55 mil bag would be .55 thousandths of an inch thick. Common Linear Low Density liners range from .35 to 2.0 mil in thickness. (i.e. .001 = 1 Mil)
- **Post-Consumer Polyethylene:** Plastic material recovered from the public and the environment. This material has typically been exposed to a wide variety of contaminants, both from the varied types of products that were carried in the plastic, and also from the many exposures the plastic may have in the environmental settings.
- **Post-Industrial Polyethylene:** Plastic material recovered from industrial sources, typically from machine start-ups, overruns, defective manufacturing processes, and related causes. This material is typically clean as it has been in a controlled environment.
- **Source Reduction:** Source reduction is decreasing the amount of materials or energy used during the manufacturing or distribution of products and packages. Because it stops waste before it starts, source reduction is the top solid waste priority of the U.S. Environmental Protection Agency.
- **Sustainability:** A characteristic of a process or state that can be maintained at a certain level indefinitely.

USEFUL FORMULAS

Mils to Micron Equivalents

Mil Thickness	Micron Thickness
0.23	6
0.27	7
0.31	8
0.35	9
0.39	10
0.43	11
0.47	12
0.51	13
0.55	14
0.59	15
0.62	16
0.66	17
0.70	18
0.74	19
0.78	20
0.82	21
0.86	22
0.90	23
0.94	24
0.98	25

How to Convert Microns to Mils

To convert microns to mils, divide the micron by 25.4 to arrive at true mil thickness.

$$7 \text{ Microns} \div 25.4 = 0.28 \text{ Mil}$$

$$34 \text{ Microns} \div 25.4 = 1.34 \text{ Mil}$$

How to Convert Mils to Microns

To convert mil to microns, multiply the mil by 25.4 to arrive at micron thickness.

$$1 \text{ Mil} = 25.4 \text{ Microns}$$

$$.31 \text{ Mil} \times 25.4 = 7.9 \text{ Microns}$$

$$.74 \text{ Mil} \times 25.4 = 18.8 \text{ Microns}$$

How to Figure Net Case Weights

LINEAR LOW

$$\text{Width} \times \text{Length} \times \text{Mil} \div 15 = \text{Lbs./1000 bags}$$

HIGH DENSITY

$$\text{Width} \times \text{Length} \times \text{Mic} \times .0027034 = \text{Lbs./1000 bags}$$

Measuring for Correct Can Liner Size

BAG WIDTH:

Use 1/2 of the outer circumference of the container.

BAG LENGTH:

Use the height of the container, plus 1/2 of the diameter of the container bottom, plus 3 inches (for overhang). For square or rectangular containers, use the diagonal of the container bottom, rather than the diameter.

COMMON TYPES OF CAN LINER SEALS

Star Seal

The star seal has become the most common type of seal in the market today. Designed without gussets, the star seal eliminates gaps along the seal where leaks can occur. This unique design allows the bag to conform more easily to the shape of the container and distributes the weight of the refuse evenly around the bag. Star seal liners maximize the bag's carrying capacity and virtually eliminate leaks. Star seal liners are designated in two dimensions, i.e., 40x46.

Flat Seal

Just as the name infers, a flat seal is simply a two-dimensional bag with a bottom seal. Flat seal bags are generally leak-proof, but are very clumsy to handle. Also, they do not conform very well to the shape of most trash receptacles. Flat seal liners are designated in two dimensions, i.e., 40x46.

Gusset Seal

A flat style bag manufactured with both sides tucked in to form gussets. Where indented, the bag has to be sealed through four layers of film, while the middle of the bag has two layers. Gusseted liners are designated in three dimensions, i.e., 23x17x46.

3 STEPS TO CHOOSING THE RIGHT CAN LINER

The range of sizes, weights, and types of can liners is nearly overwhelming. How do you figure out which can liner you need? The confusion over the variety of products is understandable, but it's not insurmountable. We have developed an easy 3-step method to make shopping for can liners easy.

Determine the proper can liner type.

There are two types of resins commonly used to manufacture can liners: Linear Low and High Density. To decide which one you need, answer this question: "Are sharp objects being thrown away?"

If yes, you need **Linear Low** (gauge/mils).

If no, you need **High Density** (gauge/microns).

What size container does the liner need to fit?

Ideally, you should have about three to four inches of overhang on the trash receptacles. The following are some guidelines to use when choosing the right size can liner.

A. Use the compatibility chart inside this brochure.

B. The gallon capacity or the size is usually printed on the container.

How much does the liner need to hold?

Here you'll need to do some calculation. You need to determine the average weight of a full can liner in your environment.

Once you have decided on the number, check the product grid on the inside of this brochure under the can liner type and size that you have selected. Go across the grid to the column marked "Max Load". Find the number closest to the average weight figure you calculated and that's the can liner you need.

LINEAR LOW

Linear Low liners are highly puncture and tear resistant. These properties make this the best choice for applications where additional strength and stretch are required. Works well for waste with sharp or jagged edges. With a wide variety of colors, strengths and sizes, you are sure to find the liner you need.

WHITE & CLEAR: Perfect for food service. The materials used in the manufacture of these liners are USDA and FDA approved for food storage.

BLACK & SILVER: Provides maximum opacity to hide unsightly refuse.

GRAY: High grade film in a neutral gray color.

TRU-MIL

HIGH DENSITY

High Density can liners are widely accepted in the market as the “economy” can liner. Features and benefits include excellent odor and moisture barrier, and very high dart impact and tensile strength. HDPE is an excellent choice for trash application without sharp edges. The complete line of Pitt Plastics HD liners will satisfy all of your customer needs.

HD LINE: The HD natural can liners are another great choice for food storage as they too are made of materials that have been USDA and FDA approved. Both Natural and Black HD liners are ideal for heavy, wet refuse.

HD VALUE LINE: Available in special sizes that will perform on a level equivalent to traditional gauges. These liners are also made of materials USDA and FDA approved for food storage.

POST CONSUMER & RECYCLED RESINS

If you’re looking for a reasonably priced, environmentally responsible product, then EcoStrong™ can liners are the answer. These liners are formulated from our own recycled virgin resin and high quality post-consumer resin. These are available in a number of assorted sizes and gauges. Another thing to keep in mind is that the EcoStrong™ liners are manufactured with up to 70% recycled content.

EcoStrong Plus™ liners are manufactured with a minimum 20% post-consumer resin including 5% curbside recycling. This product qualifies for LEED credit and is ECOLOGO Certified. Contact your sales representative for more information.

ECO Strong™

ECO Strong™
Plus

ISOLATIONS/HEALTHCARE LINERS

Complete sanitary management is available in both High Density and Linear Low Density products. We offer color-coded, printed bags for Infectious Waste, Infectious Linen and Non-contagious Linen management. Our printed stock isolation bags are imprinted with English and Spanish to help ensure complete understanding for safety and proper use. All isolation liners are available in coreless rolls.

RED: Infectious Waste Isolation bag. Printed with Biohazard symbol.

YELLOW: Infectious Linen Isolation bag. Printed with Biohazard symbol.

BLUE: Non-Infectious Waste Isolation bag. Non-printed.

OTHER BAGS

DRAW-TUFF: Linear Low liners that offer a convenient drawtape closure. Available in black and white on interleaved coreless rolls.

STRONG ONE: Our Linear Low retail liner that's also a fundraising favorite. This heavy duty liner is available in black on a convenient coreless roll.

RECYCLING BAG: Perfect for your recyclables, these liners are blue in color and clearly printed with the recycling symbol to differentiate them from regular trash.

BIOSTAR: These bags meet the ASTM D6400 standards for composting in a professionally managed composting facility. They have been tested and certified by the Biodegradable Products Institute in conjunction with the U.S. Composting Council. The BioStar liner is green and comes on coreless rolls.

FOOD & UTILITY BAGS: These bags are made from materials that are USDA and FDA approved for food storage. They are high quality and high clarity bags that provide a complete line for any specialty need.

SPECIALTY PRODUCTS: Includes: Clear Ice Bags with print, Blue Ice Bags that are non-printed, Bun Pan Rack Covers, Bun Pan Covers and T-Shirt Bags.

PITT•FIT

Tired of can liners that are too long, too short, too wide, not wide enough?

The Pitt•Fit™ Can Liner System is designed to fit the most popular receptacles on the market.

Not only do they fit like a glove, they are also an excellent choice for environmental source reduction. Because there's no excess, less plastic waste goes into landfills.

Another benefit is cost savings. Pitt•Fit™ liners will save you time and money by eliminating annoying and time-consuming bag tie-off, wasteful overhang and costly double-bagging.

- Source reduction – fits containers without waste!
 - Better for the environment
 - Cost effective – better value
- Less mess—it actually fits your container
- Quick and easy to figure out which bag your receptacle needs
 - Bags for the most common/popular can liner receptacles
 - Reference guide located on our website

Our Pitt•Fit™ Can Liners are marked throughout the catalog using this symbol:

GENERAL PURPOSE DISPOSABLE GLOVES

Inteplast/Pitt has gloves for a variety of applications. They can be used for foodservice, janitorial, healthcare, hospitality and schools. From vinyl to nitrile to latex, our gloves are sure to meet our customers' needs. Our vinyl gloves are an excellent choice for those who are looking for a latex free alternative. Our nitrile gloves are super strong and do an exceptional job creating a barrier of protection. Finally, our latex gloves offer superior comfort and fit while also providing another durable option that offers good barrier protection. Our vinyl and latex gloves also come in both powdered and powder-free options.

VINYL

Color: Natural

Description: Premium quality polyvinyl chloride (PVC)

Applications: Foodservice, General purpose

Benefits: Latex-free to minimize the risk of allergic reaction

LATEX

Color: White

Description: Natural rubber latex (NRL)

Applications: Healthcare, Food Processing, Salons, Handling small parts, General purpose

Benefits: Superior comfort, softness, and fit. Textured surface on palm and fingers provides a better grip. Provides good barrier protection.

NITRILE

Color: Blue & Black

Description: Synthetic polymer material. Alternative for latex allergies.

Applications: Healthcare, Industrial, Automotive, Inspections, Chemical handling, General purpose, Medical exam

Benefits: Latex-free, vinyl-free, and powder-free to minimize allergic reactions. Strong barrier of protection. Elastic, durable and strong.

INTE-FIT® HYBRID 1.0

Color: Natural

Description: Free of DOP / DEHP substances

Applications: Foodservice, General purpose

Benefits: Latex-free, vinyl-free, and powder-free to minimize allergic reactions.

INTE-FIT® HYBRID 2.0

Color: Natural

Description: Thicker gauge for extra strength.

Applications: Foodservice, General purpose

Benefits: Latex-free, vinyl-free, and powder-free to minimize allergic reactions.
